INVESTMENT PHILOSOPHY

The Portfolio Managers employ a disciplined seven step fundamental research process which produces bottom-up company assessments using key assumptions that drive sales, margins, and return on invested capital.

They seek to purchase companies that meet these criteria when the shares are selling at a significant discount to intrinsic value. Sell decisions are similarly driven by long term fundamental analysis.

Manulife Funds are managed by Manulife Investments, a division of Manulife Asset Management Limited. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the fund facts as well as the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. The rate of return shown is used only to illustrate the effects of the compound growth rate and is not intended to reflect future values or returns on investment. The payment of distributions is not guaranteed and may fluctuate. If distributions paid by the fund are greater than the performance of the fund, then your original investment will shrink. Distributions should not be confused with a fund's performance, rate of return, or yield. You may also receive return of capital distributions from a fund. Please consult with your tax advisor regarding the tax implications of receiving distributions. See the prospectus for more information on a fund's distributions policy.
