

This fund will systematically invest primarily in a broadly diversified portfolio of global equities, excluding Canada and the U.S., to seek long-term growth of capital. The equity selection process is based on Mawer's disciplined, fundamentally based bottom-up research process, which includes a strong focus on downside protection.

Geographic allocation (%)

Source for all data: Lipper, a Thomson Reuters company, as at May 31, 2017. *For illustration purposes only. ^oThe MER shown is a target MER (includes HST) - the manager absorbs certain expenses that would otherwise be charged to the fund in order to cap the MER at the stated target. However the manager reserves the right to stop absorbing expenses at any time without notice.

INVESTMENT PHILOSOPHY

The Fund follows the Mawer mantra of “Be Boring, Make Money”. The portfolio management team employs a long-term approach to managing a portfolio of high-conviction securities. Broad diversification measures are intended to provide overall stability to the portfolio. This approach seeks to achieve better than market rates of return together with lower than market levels of risk over full economic cycles. The strategy intends to provide long-term growth potential and risk diversification through non-North American companies.

INVESTMENT PROCESS

FOR MORE INFORMATION, PLEASE CONTACT YOUR ADVISOR OR VISIT MANULIFEMUTUALFUNDS.CA

Manulife Funds are managed by Manulife Investments, a division of Manulife Asset Management Limited. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the fund facts as well as the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. The rate of return shown is used only to illustrate the effects of the compound growth rate and is not intended to reflect future values or returns on investment. The payment of distributions is not guaranteed and may fluctuate. If distributions paid by the fund are greater than the performance of the fund, then your original investment will shrink. Distributions should not be confused with a fund's performance, rate of return, or yield. You may also receive return of capital distributions from a fund. Please consult with your tax advisor regarding the tax implications of receiving distributions. See the prospectus for more information on a fund's distributions policy.
